

**PITBULL**

# Equipment Cleaning Service

Pitbull Energy Services specializes in certified industrial equipment cleaning solutions for the Canadian oil and gas industry. Operating from our facility in Grande Prairie, we provide efficient, safe, and environmentally responsible cleaning services designed to reduce downtime and overall operating costs. Our optimized processes and advanced gamma jet tank cleaning technology deliver faster turnaround times while reducing water usage and minimizing confined space entry.

We specialize in certified cleaning of all varieties of oilfield equipment including 400 bbl tanks, horizontal tanks, mud and frac tanks, floc tanks, storage tanks, totes, and centrifuges. All equipment is cleaned at our state-of-the-art indoor facility under strict safety and environmental controls.

Our gamma jet systems provide a highly effective cleaning solution that significantly reduces manual entry requirements, improves safety performance, and increases operational efficiency compared to traditional cleaning methods.

In addition to facility-based cleaning, Pitbull Energy Services offers off-site equipment cleaning, sump cleanouts, and steamer services with field-ready mobile units capable of supporting rigs, production facilities, and tank farms across Western Canada. COR certified and ISNetworld compliant, our trained & certified personnel (CSTS, H2S Alive, Confined Space Entry) are committed to delivering safe, compliant, and cost-effective industrial cleaning solutions our customers can rely on.
